**Sometime in 2009/2010 the window will open to get financing.** In the meantime, many companies are facing unprecedented liquidity and capital resource constraints. The continuing market turmoil has nearly shut down traditional methods of raising capital in the equity markets and venture financing is becoming increasingly scarce. As the downturn continues, companies are increasingly seeking alternative sources of economic capital to drive business forward. How can technology and life sciences companies best access capital in this market?

**Please join us for a lively panel discussion featuring:**

- Alternative financing vehicles, strategies, and best practices
- NASDAQ update and implications for public companies
- Unique legal, regulatory, and accounting considerations

**Speakers:**

**Todd Wyche**, Managing Director, Brinson Patrick Securities Corporation

**Jodi Hernandez**, Partner, Ernst & Young

**Ryan Murr**, Partner, Goodwin Procter LLP
